We value each person's conventional step and snuggle up at "this time" in each person's "now".

Even if care is necessary, We want to live like oneself all the time.

It "is a four season" that we take such thought and was completed. Four season.

In other words we think that we want to do the help of a calm living like oneself while feeling seasonal joy.

The living that seems to be the degree and a thought, the care that we decide it, and is warm that accepted the mental and physical situation, the care of the one one

We keep the support that I respected in mind.
